**ABSTRACT:** According to the requirements of the military theory syllabus for general colleges and universities, through military theory teaching, students should have a basic understanding of Viet Nam's national defense military thought, information warfare, strategic environment and other related content, establish a spirit of patriotism, and understand basic military theory and Military skills, have a certain sense of national defense and national security, and enhance national cohesion and national responsibility. In addition, through military theory courses, teachers should also cultivate students' correct world outlook, outlook on life, and values, and expand the reserve for high-quality military talents in our country. It expounds the influence of military theory on the quality education of college students and puts forward suggestions for improving and optimizing military theory courses.

**KEYWORDS:** Military Theory Teaching; College Students; Quality Education.

## I. INTRODUCTION

As a compulsory course for higher education, military theory courses should provide correct guidance to every college student. Military theory courses can help college students establish a certain sense of national defense and national security, cultivate their sense of national responsibility, help college students establish a correct outlook on the world, life and values, and at the same time guide college students in their future personal development and career planning effect. Therefore, this article discusses the influence and positive effects of military theory courses on college students' quality education, and puts forward suggestions for optimization and improvement.

## II. OVERVIEW OF QUALITY EDUCATION FOR COLLEGE STUDENTS

As an educational project that promotes the all-round development and growth of every individual, quality education is not only an educational behavior, but also a social behavior. Therefore, the development of quality education has always received the attention of the whole society, and has also received strong support from the government and every family. While carrying out daily teaching activities, colleges and universities should pay attention to cultivating the quality of college students, pay attention to the development of the necessary survival skills and personal abilities of college students outside of theoretical study, and cultivate outstanding talents with many skills required by today's society. The quality education of college students includes the following aspects: First, the ideological and moral quality. That is to cultivate college students' good professional ethics and sense of social responsibility, the qualities of abiding by the law, honesty and trustworthiness, and the belief in working hard for the country and winning glory for the country. This is exactly the teaching goal and purpose of military theory courses. Therefore, military theory courses for college students have played a very good role in improving the ideological and moral quality of students. Second, cultural and physical quality. Cultivate the healthy physique and positive attitude of college students, so that college students have a higher vision and broader knowledge, stronger communication skills when communicating with others, and a better cultural accomplishment. Third, professional quality. Each major has different directions and requirements for the training of professional

quality. College students should master relevant professional knowledge and skills through the study and practical application of professional courses, so as to lay a solid foundation for the society and competent jobs.

### **III. THE TEACHING OBJECTIVES OF MILITARY THEORY COURSES FOR COLLEGE STUDENTS**

Military theory is a compulsory course for college students. For contemporary college students, military theory courses are not only a kind of knowledge teaching, but also a kind of quality teaching. The core idea that military theory courses should convey to college students is patriotism, and its teaching objectives include the following aspects:

#### **1. Main goals**

The main goal of military theory courses for college students is to cultivate students' patriotism. In classroom teaching, teachers should regard patriotism as the main theme of education. The emphasis of classroom teaching is on the instillation of national security awareness and national defense concepts, guiding students to strengthen their ideals and beliefs, consolidating the party's core ruling position, and safeguarding the society. Harmonious and stable development, cultivate students' positive outlook on life and values, so that students can establish the consciousness of studying hard and serving the motherland, so as to send qualified reserve officers to the country. At present, many colleges and universities not only regard military theory courses as compulsory courses for college students, but also incorporate military theory courses into their talent training programs to guide students to pay more attention to the study of this course.

#### **2. Direct target**

The direct goal of military theory courses for college students is to enable college students to master correct military theories and military skills, establish patriotism and national defense awareness, strengthen organizational discipline and social responsibility, and enhance their overall quality. This has a very direct significance for the personal development of college students.

#### **3. Fundamental goals**

The fundamental purpose of military theory courses for college students is: firstly, to cultivate the military quality of college students and to provide qualified reserve members for the country; secondly, to strengthen the patriotism and ideological and political quality of college students through military education.

### **IV. THE TEACHING CONTENT OF MILITARY THEORY COURSES FOR COLLEGE STUDENTS AND ITS INFLUENCE ON THE QUALITY EDUCATION OF CONTEMPORARY COLLEGE STUDENTS**

#### **1. The content of "Build a national movement to maintain national security" and "Building the People's Armed Forces" - Strengthening the patriotic consciousness of college students**

If a nation does not have enough cohesion, the nation is vulnerable to various changes and attacks, and cannot survive in society. The teaching content of "Build a national movement to maintain national security" and "Building the People's Armed Forces" is to introduce the general situation of Viet Nam's national defense, study national defense laws and national defense mobilization, so that students can have a deeper understanding of my country's current national defense status, understand the impact of war on my country's security, and establish patriotic thinking. Through learning the history of Viet Nam's national defense allows college students to have a clearer understanding of our country's history of invasion and humiliation from ancient times to the present, and stimulate their patriotic enthusiasm. At the same time, education in the concept of national defense can enhance college students' sense of national identity and national self-confidence, and further stimulate their patriotic enthusiasm.

#### **2. The content of "The people fight to defend the socialist Vietnam motherland"- Strengthen the political beliefs of college students**

Military thought includes the concept of war, the thought of national defense construction, and the guiding thought. By studying military thinking, students can have a basic understanding of my country's military thinking, military conditions, and the overall war situation in the world from a rational point of view, which can help students better understand Marxist ideology and theories, and establish a correct world outlook, outlook on life, and values. Strengthen Mao Zedong Thought, Deng Xiaoping Theory and the important thinking of the "Three Represents", clarify the path of socialism with Chinese characteristics in our country, clarify the party's ruling position, grasp the correct political direction, establish a sense of family and country, and contribute to the modernization of our country. Ideals lay the foundation for future personal development and career planning.

#### **3. The content of " Integrate economic, social development with strengthening national**

#### **defense, security and diplomacy"- Stimulate the innovation potential of college students**

As a product of social development, information technology is increasingly used in various fields, and informationized warfare is one of its forms of use in warfare. At present, the form of information-based warfare has gradually become the main theme of modern warfare. This is a war between technology, equipment and people. All factors jointly determine the victorious side of the war, but the human mind is still the key to the decisive role in the war. . Information-based warfare teaching can enable college students to understand the relationship between man, war, and technology in a deeper and multi-faceted manner, enhance the sense of unity and cooperation, stimulate fighting spirit, and firmly establish the concepts and ideas of defending the home and the country.

#### **4. The content of “To build and maintain national sovereignty over oceans, islands and borders under the new situation” and “Basic Issues of Protecting National Security and Ensuring Social Security”- Building the national security perceptions of university students**

By studying the international strategic environment, college students in a safe and stable society can become more aware of danger and establish a sense of national security; it can make contemporary college students realize that there are still many unfair phenomena and hegemonies in other places outside of our country. There are still many imbalances in global development, and wars are still emerging locally. In addition, although the current social situation in my country is relatively stable, there are still many comprehensive and complex security issues and uncertain factors, such as territorial disputes and security issues that are still intensifying. By studying the international strategic environment, students can have a more in-depth understanding of the current strategic environment of countries in the world and the problems and challenges facing our country. Studying the international strategic environment can enable students to better establish national security awareness and awareness of distress, and have a more sense of responsibility.

### **V. SUGGESTIONS FOR OPTIMIZING THE TEACHING OF MILITARY THEORY COURSES**

#### **1. Grasp the yardstick and play it appropriately, keeping it consistent with the objectives of military theory courses**

Through military theory teaching, students should have a basic understanding of Viet Nam’s

national defense military thinking, information warfare, international strategic environment, and other related content. Through military theory classes, students should establish the spirit of patriotism, understand basic military theory and military skills, have a certain sense of national defense and national security, and enhance national cohesion and national responsibility. In addition, through military theory courses, teachers should also cultivate students' correct world outlook, outlook on life, and values, and expand the reserve for high-quality military talents in our country.

#### **2. Optimize the content of military theory teaching and pay attention to the implementation of teaching practice**

The military theory teaching in colleges and universities should pay attention to the optimization of teaching content. Teachers should rebuild the teaching framework, and deeply grasp the logical relationship between military theory teaching and quality education, and based on the purpose of quality education, flexibly adjust the content of military theory teaching so that it can be standardized and systematized, and the knowledge involved can be achieved. Relevant education departments should pay more attention to the in-depth implementation of quality education requirements in the process of compiling military theory textbooks in colleges and universities, effectively handling the relationship between traditional and modern military theoretical knowledge, and grasping the contemporary connotation of military theory teaching. In addition, colleges and universities should pay attention to the implementation of teaching practice in the process of teaching military theory. Military theory teaching has a positive impact on the cultivation of college students' innovative potential, solidarity and cooperation, national security awareness, political beliefs and patriotism. Therefore, in the teaching process, teachers should not only pay attention to military theory teaching, but also improve students' scientific research. Ability to develop students' military skills. Through the organic combination of theory and practice, a three-dimensional teaching model is formed, and the real application value of military theory in the quality education of college students is brought into play.

#### **3. Pay attention to the breakthrough of traditional teaching methods, strengthen the teaching effect and practical significance**

In the teaching mode, teachers should not blindly limit the teaching style of narration. In addition to traditional narration and blackboard writing, teachers should also make full use of

multimedia teaching resources to organically combine video, language, text, and images to make the abstract and boring The content becomes more specific and vivid, which makes the classroom atmosphere more active and stimulates students' enthusiasm for learning. Because the content of military theory teaching is relatively complicated, the use of multimedia teaching methods can increase the interest of the classroom, strengthen student interaction, and simplify complex issues. At the same time, the display of pictures, videos and sounds can guide students to experience the charm of modern military technology and high-tech warfare personally, cultivate students' interest in this course, and subtly master more military knowledge.

## VI. CONCLUSION

As a basic course and ideological course, each chapter of the military theory course embodies the education of people. This course includes not only military and national defense content, but also the world situation and military thinking. It can be said that military theory teaching can help college students to establish a correct outlook on life and values, and it is also an important link in the implementation of quality education in my country's colleges and universities. Therefore, college educators should give full play to the advantages of military theory courses, help students better master the teaching content of this course, improve the overall quality of our college students, and apply career planning to military theory courses to guide students Put more patriotic enthusiasm and sense of social responsibility in future career development, and devote more proactively to socialist construction, and make contributions to society and the country.
