**ABSTRACT:** This paper discusses the case of Indian nurses who take up their profession as part of a family strategy, where planning for education and migration are intrinsic to the whole process. In effect, they migrate in a step-by-step phased manner: first within Indian states, mainly to metropolises, then to countries in the Persian Gulf, and further towards the West. It is not a simple, linear course of migration for them nor is it unique in any extraordinary way: yet their stories offer a terrain that is hitherto unexplored.

**KEY WORDS:** profession, migration, unique, strategy.

### I. INTRODUCTION:

Standards are professionally developed expressions of the range of acceptable variations from a norm or criterion"-Avedis Donabedian. Standards may be defined as "Benchmark of achievement which is based on a desired level of excellence. Criteria are pre-determined elements against which aspects of the quality of medical service may be compared. They reflect a desired and achievable level of performance against which actual performance can be compared. Their main purpose is to promote, guide and direct professional nursing practice.

### II. REVIEW OF LITERATURE

YEAR	TITLE AND YEAR PUBLISHED	AUTHORS NAME	FINDING
1999	Fuel cells for homes and hospitals,1999 n Ergonomic Study of Chronic Musculoskeletal Pain in Schoolchildren	RONALD H. WOLK	Their one grave drawback so far is limited commercial viability, but fortunately this is more an economic than a technological concern. Although British physicist William Grove invented the cells 160 years ago, their cost until recently restricted them to military and space applications, for instance, aboard submarines and the space shuttle..
2002	Big Changes in the Indian Health Service: Are Nurses	HOLKUP, MA, PATRICIA A	However, this reply only partially Describes the

	Aware,2002		<p>context that brought about the need for change in the IHS. Demographics, the diversity of the Native. American population and its relationship to the federal government must also be considered. The challenges facing the IHS are challenges facing the American nursing profession because of its commitment to advocate for access to affordable, comprehensive health care for all people</p>
2004	Conflict Management Styles of Asian and American Nurses	RuthDavidhizr	<p>Foreign nurses and American nurses who are culturally diverse make up an increasing number of the US nursing workforce. Of foreign nurses, Asians constitute the largest number. Conflict is an inevitable aspect of human relations in health care settings. Nurses and other health team members with diverse cultural background bring to the workplace different conflict behaviours that directly impact the outcomes of conflicts.</p>
2005	Occupational exposure to blood and risk of blood borne virus infection among health care workers in rural north Indian health care settings ,2005	Michelle Kermode,	<p>Health care workers (HCWs) may be exposed to the risk of infection with blood borne viruses (BBVs) such as</p>

			Hepatitis B virus (HBV), hepatitis C virus (HCV) and human immunodeficiency virus (HIV) via contact with blood (and other body fluids) in the course of their work.
2006	Research Careers for American Indian/Alaska Native Nurses,2006	Henly, PhD, Roxanne Struthers	Nurse scientists and student services professionals experienced in supporting AIAN students in high stakes, competitive academic environments are represented in the consultant group. As a group, the AIAN consultants were part of an earlier wave of students who successfully negotiated the higher education system in relative isolation and then thrived in their careers, even as they maintained their AIAN heritage and identities.
2012	The Role of Healthcare System of Systems and Collaborative Technologies in Providing Superior Healthcare Delivery to Native American Patients,2012	Nilmini Wickramasinghe	Clients of the Urban Indian program commonly experience barriers in accessing basic health services due to a multiplicity of reasons mostly connected with poor data, bad information and minimal knowledge.
2013	Contrast-Induced Nephropathy, 2013.	Ann L. Jorgensen	Prevention strategies focus on counteracting

			<p>vasoconstriction, enhancing blood flow through the enthrone, and providing protection against injury by oxygen free radicals. Knowledge of the adverse effects associated with infusion of contrast media, identification of patients at risk for contrast-induced nephropathy, and application of evidence-based prevention strategies allow nurses to assist in the prevention of contrast-induced nephropathy.</p>
2017	Smart Health Monitoring System of Patient Through IoT,2017.	S Pradeep Kumar	<p>From this server the information can be envisioned to the specialists and other paramedical staff by Thing speak android app. In this way by utilizing this Smart health monitoring system diminishes the exertion of specialists and paramedical staff to screen the patient for 24 hours and furthermore lessens the time and cost of Support.</p>
2018	A Survey on Smart Homes for Aging in Place,2018.	Viswam Nathan, Sudip Paul,	<p>The key lies in building intelligent, Efficient algorithms that can provide valuable insights from daily patterns, e.g., from the changes in a user's gait patterns or eating habits. The new algorithms could</p>

			also enable predictions of future irregularities, allowing us to turn these predictions into actionable information impacting the quality of life and care delivery, while offering opportunities for adaptive interventions and personalized medicine.
2019	Gender and research publishing in India: Uniformly high inequality,2019	Mike Thelwall	The substantial female minority overall and in all 26 broad areas of scholarship underlines the importance of initiatives to overcome gender inequalities in research within India (e.g., the Indo-U.S. Fellowship for Women in STEMM), although a more systematic effort is still needed (Ovseiko, Godbole, & Latimer, 2017). The differences with the USA confirm that national policies or cultures can influence the gendering of science.

**RESEARCH GAP**

The feedback of immigration nurses of immigration nurses was done in various methods but not particularly in Madurai, Tamilnadu, India hence we have catered to it.

**III. DATA ANALYSIS AND CONCLUSION**

We use excel sheet to analysis data and we use simple random sampling to pick data. Convergent and discriminate was proved.

**HIGHEST QUESTION**

**Question 1:**

Immigrating Nurses treat me with respect-3.38

**Question 2:**

Immigrating Nurses smile whenever that approaches me-3.37

**LOWEST QUESTION**

**Question 10:**

Immigrating Nurses involved my family in hospital care-2.7
