I. INTRODUCTION

A startup is a young company incorporated to produce a unique product or service. Τt is a company isstillinitsinitialstageofoperations. According to the fo underofleanstartupmethodology, EricRiles, itisdefine d as, "A human institution designed to create a new under or service conditions extremeuncertainty." The purpose of this business venture is to solve a particular problem or find a the potential challenges that can create a business opportunity. Investing in these companies implies a significant risk for the investors since a startup does not have any previous financial records. Therefore, itisusuallythe founderswhoinvestintheirownstartups.

Without a doubt, they are the lifeblood of our economy and innovation across the world. As they lead tojob creation, fresh products, dreams, and disruption. They are led by individuals who work hard to bringtheirideastolife, these entrepreneurs have the power to change the world.

As Michelle Obama once famously said, "No country can ever truly flourish if it stifles the potential of itswomenanddeprivesitselfofthecontributionsofhalf ofitscitizens."

Forcenturies, women's role in the work placeh as been highly under mined due to the conflict of work with responsibilities at home. But only since the past few years, the status of women in India has been subject to many great changes. They can now take part fully in education, sports, politics, media, art, the services ector, science and technology etc.

For a group that constitutes almost half the population in India, their share in labor force participation isless than one-third and even lower in entrepreneurship. Most of the female-owned businesses are mainlyunorganized or restricted to the agricultural sector in rural areas with very

limited growth opportunities. Thus, a seconomic resources, their potential remains largely untapped.

While Indian women are ambitious, they have found it difficult to make a significant contribution to theeconomy due to a number of structural and societal barriers that exist in our country, including societalterms, unconscious biases, the gender pay gap, unfriendly working conditions, and a lack of financial support. Many women have entered this world of business, trade, and commerce, and have gone on tobecome successful entrepreneurs in a number of fields. Despite the increase over the previous 10 years, their percentage of engagement or inclusion in the corporate sector is still relatively low. Women's involvement ineconomic activities is growing at a substantially slower rate than anticipated.

The rising presence of women as entrepreneurs has resulted in a shift in the demographics of andthecountry'seconomic prosperity. Womenownedcompaniesareplayinganincreasinglyimportan troleinsociety, motivating others and creating more em ploymentoptions around the country. There is a need for women entrepreneurs to continuously in order tosustainbalanced growth in the country. This may be accomplished by the entrepreneurshipecosystemthroughpoliciesandinitia tives, as well as the formation of enabling networks. According to Dell-commissioned research on women's global entrepreneurship performed in the UnitedStates, the United Kingdom, and India, the ideal country for a woman to start a business in beIndia,andthatanewwaveoffemaleentrepreneurship islikelytothriveinthisage.

INVESTMENT IN STARTUPS DIRECTED TO FEMALE-LED COMPANIES

India has quickly risen to become a startup country, with just 3,100 firms in 2014 and a projected total ofover 11,500 by 2020. In line with the data supplied by the Indian government, India boasts the world'ssecond-largest startup ecosystem, with a YoY rate of growth of 10-12 percent. In fact, three to four techbusinessesarefoundedonadailybasiswithintheUn ited

States. According to Tracxnstatistics, 2019 marked a watershed moment for finance in India, with about \$20.44 billion (the most in five years) invested in Indian businesses.

Butwhatproportion of this money went to female ledbusinesses?

According to Venture Intelligence statistics, only 6.5 percent of the funding raised by the highest 150funded start-ups in India was directed to women-founded or co-founded start-ups in 2019, being rockbottominthelastfiveyears.

This is due to the fact that the number of female entrepreneurs seeking finance is surprisingly small. According to Kshama Fernandes, CEO of Northern Arc, a non-banking finance firm(NBFC) that offersfinancingtounderbankedindividuals and enterprises in India, the current problem is allow foundation.

Women make up only 14 percent of India's overall entrepreneurs, while accounting for almost half of thecountry's population, according to data from the Startup India webpage. Women-founded/co-foundedbusinesses accounted for just 14% of the top 150 financed start-ups in 2019. (as per Venture Intelligencedata).

In 2018, just 9.3% of the top 150 financed companies were established or co-

foundedbywomen, the lowest percentage in the pasts ix years. It rose to 14.4% in 2019 and is expected to reach 16.7% in 2020. However, this percentage is still on the lowend of the range, accounting for less than one-

fourthofthetotal.

AccordingtotheEconomicSurvey2020,60% of wome ninIndiabetweentheagesof15 and 59 workfull-time at home. Women have not fared well in the growing start-up boom. India has seen an increase in thenumberofnewenterprises overthe previous decade, although the majority of them were founded or led by males. According to the Ministry of Statistics and Programme Implementation's 2016 study, women account for just 13.76 percent of India's entrepreneurs, or approximately 8.05 million of the country's

58.5millioncompanyowners.Despitethefactthat the government has undertaken a slew of initiatives to

encourage women to start businesses, the figuresremainabysmal.

Our leaders' vision of striving to make India a \$5 trillion economy by 2025 is also restrained owing to the COVID-19 lockdown that in the past 2 years has further impacted prospects for India's female workforce. This clearly indicates their importance in the country and to the economy.

WOMEN & UNICORNS IN INDIA

A "unicorn" is a phrase used in finance to denote a privately held firm with a valuation of more than \$1billion.AileenLee,aventurecapitalist,coinedtheter min2013tocharacterisetheuncommondigitalfirmsval uedatmorethan\$1billion.

Aileen Lee, a venture capitalist and the founder of CowboyVC, a seed-stage investment firm located inPaloAlto,California,coinedthetermandpopularised it."Onebillionisbetterthan

\$800 million because it's the psychological barrier for potential consumers, workers, and the press," saysAileenLee.

So far, the year 2021 has been a recordbreaking year for Indian startups, with new-age businesses goingpublic, securing thelargest funding agreements, and more enterprises valued at over abillion dollars.

Indian startups have raised \$23 billion in 2021, according to Tracxn, a business analytics firm. This issubstantially more than the ecosystem's projected revenue of \$13 billion in 2020.

TheoverwhelmingdesireofinvestorshaspushedIndia' sunicorncountto56.

So far this year, 27 businesses have been valued at over a billion dollars and have joined the unicorn club,including online pharmacies, social commerce, infrastructure-led marketplaces, and more. Only one ofthem, though, is led by a woman. Ruchi Kalra, Vasant Sridhar, Bhuvan Gupta, and Nitin Jain createdOfBusiness, which provides raw material procurement services and loans to small and medium enterprises(SMBs).

According to Mint India, the unicorn list is nearly entirely made up of men, as expected. There are nowomenamong single-founder unicorns. Women makeup 4% of companies with multiple founders. Women founders account for only 3.8 percent of all companies, which is a by small ylow. Thi

EDUCATION & WOMEN

Management colleges in India had the largest proportion of males, according to data collected from 223business schools throughout the world. According to the AMBA Application and Enrolment Report 2020,"India had the most uneven cohorts for gender - just 19 percent of both applicants and enrollees in 2019werefemale."

The IIMs appear to have enhanced gender diversity on their campuses this year. This year's PGP-24 class, according to IIM-Kozhikode, is also one of the institute's most diverse in previous years, with up to 52% of the incoming cohort being female.

In this PGP batch, IIM-Rohtak has also enrolled 69% females. This is the largest number of females in thehistoryoftheIIMs.FemaleenrolmentatIIM-Rohtakhasincreasedfrom9%in2017to69percentpres

Traditional notions of professional success are being challenged and transformed by women executives. This is particularly evident in the technology and startup industries. Women's entrepreneurial activities, both in developed and developing countries, are seen to contribute to socioeconomic progress, and it isbelieved that harnessing the full potential of all human resources is critical for long-term development. Glass ceilings are being broken as more women enter traditionally male-dominated fields. Women leadershaveyearnedtoleavetheirimprints in the field of

entrepreneurship, eventhough the pace is slow currently.

Female employees make up between 27 percent (Microsoft) and 47 percent (Netflix) of the workforce atbig IT businesses, according to data company Statista, with the ratio dropping significantly lower when itcomes to real technology-related roles. The funnel for women employees grows tighter and narrower asthey advance in their professions, yet these women

leaders have demonstrated exceptional devotion toachieve their objective despite all difficulties. Nothing is impossible for women to achieve if they are given the appropriate combination of high education and equal chances.

Here are some well-known Indian female entrepreneurs who have proven that they can lead a company

allbythemselves, and that it is not beyond their wit.

RESEARCH METHODOLOGY.

Thesourcesofdatausedinthisstudyareprimar yandempiricalinnature.100undergraduatestudents(5 0-Males and 50-Females; all of them within the age group of 18-21 years) were surveyed. The surveyconsisted of various questions to know about future career choices of students and determine

whether theywere more inclined towards starting their own business or getting a job. More specifically, the goal was todetermine what percentage of girls chose to start a business in relation to boys. The questions that wereaskedduringthesurveywere:

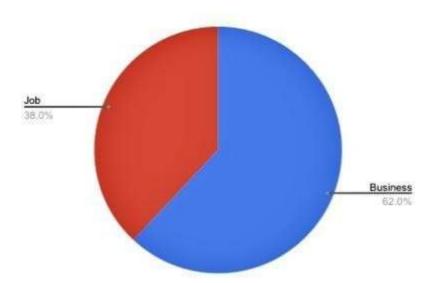

- ·Doyouprefer businesstojob
- ·Whatareyourthoughts

aboutstartingyour

ownbusiness

 $\cdot A reyoup lanning to pursue higher education? If yes, the nwhich field would you be interested in? \\$

The pie chart represents the percentage of people interested in taking up a job and starting their ownbusiness.

Out of the 38 students interested in starting their own business, only 2 were females and the rest were allmales. This clearly indicates that at a very young age characterised bydreams, ambition, and thirst forsuccess, these young girls

have developed a fear of breaking gender barriers and doing the extraordinary. Further in the paperitis discussed why this sphenomenon is prevalent.

Only 2 out of 50 females wanted to start their own business. Whereas, 36 out of 50 males were interestedin doing so. On studying the attitudes of females about business, it was found thatmost of them

foundstartingabusiness'toorisky', 'stressful' and 'cap italintensive'. On the other hand, most boys associated a business with terms like 'personal growth', 'rewarding' and 'independence'.

CHALLENGES

Listedbelowarethemajorproblemsthathinderawoma nfrombecominganentrepreneur.

♦ LackofFinance

Familymembersarenotsupportiveoffemalee ntrepreneurs. They are he sitant to put money into compa niesstartedbythem.Almosteverywomanentrepreneur has difficulty obtaining institutional funding. The issue sprimarily stemmed from social attitudes and bias, the difficulty of obtaining collateral-based loans (sincewomen do not own property), and a lack of awareness or understanding of financial schemes, particularlythose that offer collateral-free financing. Only 17% of women entrepreneurs polled for **IFC** the researchwereawareofgovernmentorfinancialinstituti ons'financinginitiativesforwomen.Evenamongthose whowere aware, there was little clarity on the precise features of schemes, their importance in resolving theirproblems, and their ports of entry. Banks and other financial institutions do not view Middle Class WomenEntrepreneurs as suitable candidates for establishing their businesses, and they are hesitant to lend moneyto unmarried women or girls because they are unsure who will repay the loan after their marriage — their parents or in-laws. Unmarried women are humiliated as a result, and they abandon their plans to start theirownbusinesses.

Kiran Mazumdar Shaw, for example, had a lot of difficulties getting funding for her firm at first. Bankswere hesitant to give her a loan as biotechnology was a totally new field at that point of time and she was awomanentrepreneur, whichwasararephenomenon.

& Lackofeducation

This is a significant impediment for women since it may serve as a foundation for success or failure in anyendeavor.InIndia,almost60% of women are allege dlyilliterate,which has long been one of the country's most serious socio-economic issues. Women are cut off from global events, particularly technology upheavals, rising and declining markets, and economic expertise of any sort, due to a lack of even basicunder standing.

Asaresult, a lack of exposure is a significant obstacle towomen's advancement and one of the most serious issues confronting female entrepreneurs.

Strikingabalancebetweenfamily&business
Women, particularly married women with
children, have a great deal of responsibility.

Naturally, jugglinga job, family, and business is difficult for them, and achieving a work-life balance with so much on yourplate is truly an art. Working for oneself provides a lot of freedom, but every business is a roller-coasterride for the most part, and juggling children, elderly parents, and, of course, one's spouse can be incrediblytough. Women's daily lives may be made a lot simpler if they have an effective and appropriate team thatcan handle the job that has been allocated to them, keep sharp, and stick to commitments. Needless to say, timemanagementandsupportfromtheirspouseisc rucialinthissituation.

Confidenceinbusinessskills

Clichés such as "business is not a woman's world" and "men are more adept in financial concerns"

areperpetuatedbyoftenrepeatedstereotypes. Asaresul tofthesebeliefs, womenentrepreneurs are frequently regarded with less respectand experiences keptic is mwhile edealing with business partners. It's more difficult for women to acquire a business attitude when they have to deal with negative comments regarding their work. As are sult, it's not unexpected that women are typically less confident in their own business accumenand abilities. In reality, extremely successful women frequently experience self-doubt and underestimate their skills and performance, whereas males experience the opposite. Furthermore, it has been

discoveredthatmostmalesalmostuniversallybelievet heyarefarbrighterthanwomen,despitethefactthatarro ganceandoverconfidenceareinverselyassociatedwith leadershipability.

♦ Male-dominatedIndustry

Women entrepreneurs are creating waves in the market with their devotion and energy, but despitepossessing the appropriate mindset and aptitude for the work, women are still viewed as inferior males.MalechauvinismpersistsinIndia,anditisnotlimi tedtoruralregions; italsoexists in metropolitan settings. Women's societal and cultural expectations have always been different from men's. Despite the fact thatwomen are now capable of handling both home and professional tasks with ease, our patriarchal culturestill perceives them as taking on the role of a husband and outrunning him. Even in the sector, womenaccount for approximately 47% of the workforce, still it has a bias towards a male wav doingtasks. This is not just a problem faced by women en trepreneursbutalsoaburningsocietalproblem.

Limitedmobility

Women's safety is a major global concern. This problem persists in our country as well, and to a

shockingdegree. Asing lewoman cannot travelatanyti meorplace to getraw materials, attendimportant meetin gs, or fly to another nation or city without first obtaining permission from her parents or spouse. In order to achieve gender parity, mobility has been highlighted as a new metric. Mobility and involvement in the work force are inversely proportional. A saresult loss.

theworkforceareinverselyproportional. As are sult, lo wering bus and metroprices and making transportations moother and safer, particularly during peak hours, is a sure-fire method to improve accessibility and affordability.

Furthermore, by guaranteeing total protection for women, the fundamentally patriarchal permission culturemay be effectively combated.

Low-riskbearingabilityandfearoffailure Thisisoneofthemostcommonissuesfacedby

femaleentrepreneurs. Womenarenaturallylowrisktakers, which is understandable given that they must considerandcareforsomanyfactors in their setting, as w ellastheconsequencesoftheiractions. Manywomenliv einpoverty and are not financially self-sufficient. As a result, they are always afraid of failure andjudgement, asaresult, they are unable to take all kinds of chances, and makeallkindsof movementsintheirentrepreneurial path. Because of their uncertainty and self-doubt. are less likely to dream big stavintheirlanewhenthevshouldbeoutintheworldmak ingthingshappen. However, this is rapidly changing as women, with the right support, are able to take risks. So, the solution to this problem is to simply recognise that taking risks is an ecessary part of beinganentrepreneur, whether you'r eam aleora woman. Womenwillbeabletobeatmalesattheirowngameinnot imeiftheyperfectthisskill.

Lackofasupportnetwork

Entrepreneurial success needs a strong network and a capable staff. Nearly half of female entrepreneur say they don't have mentors to help the malong the way. In every sector, personal and professional, networking has become the new go-

to. When it comes to jobhunting or establishing abusines s, it is less about what you know and more about who you know. Women must attend networking and entrepreneurship events that are specifically tailored to them and their fields. Despite their accomplishments, women feel compelled to comply

and choose to follow a preconceived notion of what a leader should be. Realizing they are enoughtoshattertheglassceilingbyjustbeingwhothey areistheidealsolution.

OPPORTUNITIES AVAILABLE IN INDIA FOR WOMEN ENTREPRENEURS

A. GovernmentSchemes

Since India's independence, policy efforts aimed at women have tended to be more welfare-oriented thandevelopment-oriented. This was the situation until the 1970s. Only since the 1970s has there been anoticeable change in this approach. For a change, the 1970s saw a greater emphasis on the developmentprocess. As a result, in the 1980s, a multi-disciplinary strategy was adopted, with a particular emphasis onhealth, education, and employment. Women's empowerment has been prioritised in all areas, especially insmall-scaleindustries. Women's economic contribution throughself-

employmentandbusinessventureshasbeengivenincre asedemphasisbythegovernmentandnon-governmentalorganisations.

Today, the Government of India has over 27 schemes to help women find the necessary environment

todevelopthepsychetowardsentrepreneurship.Herea re7ofthem.

1. StreeShaktiPackage

Stree Shakti Loan is a government initiative that aims to combine both human and material resources inorder to empower women in rural communities. A majority of State Bank of India branches (SBI) in Indiaprovide specifically designed loan to encourage and promote entrepreneurship women's offeringfinancialhelpandadministrativeconcessions. Amajorcriterionisthatacompany'ssharecapitalshould beheldbywomeninexcessof50%. The Stree Shakti Loa nSchemeintendstoencouragewomenentrepreneursw hoownandmanageretail businesses, professional and self-employed businesses like as physicians and beauty parlour operators, among others. This is a disadvantage for other female owned enterprises with less than 51% stake ofwomen. But the biggest benefit is that it does not demand collateral for loans Rs. 5 lakhs for up to smallsectorfirms. If the loan surpasses Rs. 2 lakh, the ban kgivesfurtherhelpbyofferingareducedinterestrate.

2. AnnapurnaScheme

The Annapurna Scheme gives a credit of up to Rs. 50,000 to women entrepreneurs in the food

cateringindustrywhoarestillintheprocessofbuildings mallfirms. Itenables them to use it for capital needs such as purchasing equipment and utensils, establishing vehicles etc. Women can sell packaged food items andsnacks under this programme, which is one of most typical companies that women entrepreneurs seekout and succeed in since it is something that housewives have been handling their entire lives and are usedto. Sales increase since they now have access to more finance and more items to help them theirbusinessthantheycouldpreviously. This is the fines tinitiativeforwomenintheagricultureindustrywhenlo oking for a startup loan in India, offered by the State Bank of Mysore and Bharatiya Mahila Bank. Aftertheloan is accepted, they do not have to pay an EMI for the first month. But the maximum sum that maybe obtained is Rs. 50,000. The borrower must return the loan in 36 monthly instalments with the interestrate that is determined on the market rate. There is also a need for a guarantor and assets of the businessbeingpledgedascollateralsecurity.

3. Cent-KalyaniScheme

TheCentKalyani,offeredbytheCentralBank ofIndia,isforfutureandupcomingwomenentrepreneur s. This loan is a vailable to women who want to create mic roorsmallbusinesses, suchashomemeal deliveryor a beauty salon. This loan has no collateral requirements and no processing costs. The objective thisinitiativeistogivealoantochosensuitableindividua lstohelpthemmeettheirday-todayexpensesaswellastheir expansion needs. Under this plan, loans of up to one crore rupees are approved at a 20% marginrate. This programme does not need any collateral or guarantors, and the interest rates on are determined by marketrates. But it is only available fo rwomeninSMEsandmediumenterprises, and retail, tra ining, and self-helpgroups are in eligible.

4. BharatiyaMahilaBankBusinessLoan

This banking plan was designed in the first place to assist women and their enterprises on a broad scale. Women have dabbled in a multitude of sectors and are continuously striving for success. This bank wasfounded with the goal of empowering women economically. Despite the fact that Bhartiya Mahila Bankwasmergedwith SBI afewyears ago, its objective of increasing economic possibilities for women has not changed. The major goal is to assist aspiring female entrepreneurs who want to start new businesses in the retail, micro, and small business sectors.

BMBoffersinitialcompanyloanstowomenin

theretailandindustrialindustriesthroughthisprogram me.Manufacturing sectors can borrow up to Rs. 1 crore, for retail and service businesses this is up to Rs. 5crore. The most tangible advantage of this loan is that no collateral security is required for loans up to onecrore. It is also not confined to women who work in small businesses. Unfortunately, if you are self-employed, you must have a minimum of 2 years of work experience to qualify for this loan, according tothequalifyingrules.

5. DenaShaktiScheme

Dena Bank provides this programme to female entrepreneurs, although it is only available to individuals who work in agriculture, retail, manufacturing, small businesses, or microcredit organisations. Womenentrepreneurs can borrow up to Rs. 20 lakh at a 0.25 percent interest rate under the Dena Shakti Scheme. The maximum ceiling limitations for women beneficiaries are set by the RBI and are based on the industry in which they are growing or proposing to launch a company. Microcredit loans of up to Rs. 50,000 are also available under the initiative.

6. Mudra YojanaSchemeForWomen

Following the government's launch of the "Make in India" campaign, the Mudra Loan Yojana for womenhas gotten a lot of attention. It is a Government of India project that aims to enhance status the womeninIndiabyofferingbusinessloansandothersup portsothattheymaybecomefinanciallyindependentan dself-sufficient. Women entrepreneurs can get a loan of as little as Rs. 50,000 and as much as Rs. 10 lakhunder this plan. This programme offers numerous different sorts of programmes according to the type ofbusiness, the extent of expansion, and the loan objective. It focuses on offering initial business loans towomen in microbusiness units and groups of women who wish to establish an enterprise together. Thebiggest drawback is that it's not offered by all banks. The banks first have to the criteriathatissetbythegovernment.Eventheinterestrat esfordifferentcategoriesarenotuniform, and vary from onebanktoanother.

7. OrientMahilaVikasYojanaScheme

Oriental Bank of Commerce created this program for women who own 51 percent of a company's stockindividually or jointly. This is a fantastic chance for these stakeholders to build their businesses while alsocontributing to the advancement of their area. The initiative offers women entrepreneurs in small-scaleenterprises a

credit ranging from Rs. 10 lakhs to Rs. 25 lakhs. The above-mentioned loans do not demandany type of collateral, and the payback time is seven years, which is pretty flexible. Additionally, thisprogramoffersa2% interestrate reduction.

B. AcceleratingWomenEntrepreneurs-StartupIndia

 $AWE (Accelerating Women Entrepreneurs) i\\ sahigh-$

impactlearningprogramdesignedtohelpwomenledenterprises accelerate their growth. The program, which is sponsored by theWICCI Banking and CreditCouncil(WICCIBCC),willaddressallareasofg rowingabusiness,includingdevelopingabusinessplan ,researching financing possibilities, connecting with mentors, and generating networking

opportunities. Participants can show case their business concepts to investors during a speed networking session at the end of the event. HSBC India and Start-up India are partners in the initiative.

WICCI Banking and Credit Council is a lead council of WICCI, a national business chamber in Indiadedicated to strengthening women entrepreneurs, professionals, and leaders. It offers the cohort a variety of financial and non-financial benefits, such as access to up to INR 25 lacs in unsecured credit, assistance with business/pitch decks and presenting chances to potential investors, information and mentorshipsessions, and soon.

C. Additional efforts are being made by Corporates in India to boost their gender diversity and arepromoting women entrepreneurship programs through their CSR initiatives, supported in their stride byNGOs,self-helpbodiesandindustrialorganizations.

SOLUTIONS

InstitutionalandPolicyBasedSupport

Womenentrepreneurscanbeencouragedbyg overnmentpoliciesandlawsrelatingtobusinessandind ustry. This strategy would necessitate: - a review of the current regulatory framework and any required changes. To involve women entrepreneurs in the realm of industry, trade, and commerce, the government and non-governmental organizations must take measures to disseminate various policies, plans, and strategies tothem. Taking important steps to lower administrative barriers, particularly for women businesses. In associety where bureaucracy, red tape, and corruption are at an all-time high, it is even more critical toguarantee that women are not harassed and are secure. Keeping up

with regional and labour sentiments, dealing with smugglers in the grey market and counterfeit goods, acquiring social capital, are all tasks that female entrepreneurs may not have to deal with if rules and policies are strictly enforced and wrong doers are punished. Providing accessible and discounted finance for women's business ventures. Soft loans and subsidies for women in business should be offered to encourage them to engage in industrial

activity.Financialinstitutionsshouldgivemoreworkin gcapitalsupporttowomenentrepreneurs.Womenmig htbeaided and assisted in accessing resources and mobilizing finances from existing government programs

and incentives in order to expand their entrepreneurial activity in the state.

• Directing Women Entrepreneurs to high grow th areas

Facilitating the entry of women entrepreneurs into areas where high growth is expected will not onlyencourage families to change their mindset as profitability ensures great returns but also help the Indianeconomy flourish. Special incentives, tax rebates, duty cuts and subsidized landand machinery can be provided to encourage women in emerging sectors. Special recognition should be awarded to women participating in such targeted industries.

DevelopingProfessionalcompetencies

Women entrepreneurs must refine their skills and refresh their expertise by incorporating the newesttechnological advantages into their businesses. To encourage them to start a small business, a series oftraining programmes in the areas of managerial skills, leadership development, marketing techniques andtie-ups, different types of production and their processes, strategic planning, profit planning, bookkeepingand accounting must be provided. As previously said, sky's the limit for well-educated withsupportivefamilies. Highereducation incentives f orwomenfromruralareas, advanced training program mes for women's management development, and establishment of polytechnics industrialinstitutions for women are the main thrust areas for enhancing women's entrepreneurial aptitude

viaeducationandtraining.Ontheotherhand,havingacc esstotechnologycanhelpwomenentertheworkforcem ore quickly. High-quality STEM (science, technology, engineering, and mathematics) education,

wellasdigitalliteracyandearlytrainingprogrammes, ar ecrucial. Providingwomen with broadbandaccess and encouraging them to learn about hardware, software, and other digital to ols will not only provide them with lifeskills, but will also assist the mingrowing their businesses.

EntrepreneurshipCounselling

entrepreneurs Women can benefit significantly from entrepreneurship counselling provided by women-oriented non-governmental organisations, low-cost microfinance and bank support for new businessprojects launched by women entrepreneurs, and privileged infrastructure support such as priority landallotment and administrative approvals. As a social obligation, educational institutions should collaborate with government and nongovernmentalgroupstoaidwomeninthegrowthofentr epreneurship, particularly in the planning of business ve ntures.

Encouragementthroughrecognition

The most compelling reason for someone to labour for a cause is not money, but social. Being a c-suiteexecutive comes with a lot of prestige and respect, especially for a woman who might otherwise be stuckat home performing a dreary job. Women's entrepreneurial engagement in the economy can also be aidedby the private sector. In 2009, TiE Stree Shakti (TSS) was founded with the help of a distinguished group of NRI investors and Indian entrepreneurs. Women who own tiny, medium. and large-scale businesses inthemanufacturing, service, and social sectors are targ etedbythisgroup.Itisapan-

❖ Tax&MonetaryBenefits

Startups in India are entitled for a tax credit of 100 percent on profits for three years in a row if their yearlyrevenue does not exceed Rs.25 crores in any given financial year. This will assist startups in meeting theirworkingcapitalneedsthroughouttheirearlyyearso foperation. The government would be prudent to extend this three-year period for female-founded or cofounded businesses. There is no special income taxexemption for women at the moment. Women entrepreneurs, on the other hand, are hoping for similar exclusions to minimize tax liabilities, boost participation, and assist the startup economy. Benefiting from tax break, boosting aspiring entrepreneurs, and reforming education are all things that are on the table. They believe that reorganizing compliance for new enterprises and putting in place banking sector safetynetswillgoalongway.

BridgingtheGenderFundingGap

Taking into account their educational background and innovativeness, female entrepreneurs have lessaccess to venture financing than their male counterparts. This effect is especially apparent in the case of university-educated entrepreneurs and entrepreneurial initiatives with a highlevel of R&Dactivities. In this case, offering many tax perks to venture capitalists and angel investors that invest in women-founded/co-founded businesses will be extremely advantageous in closing the gender financing and salary gap in our nation.

II. CONCLUSION

Women are continuously setting the bar higher and revolutionizing the startup industry. Gone are the dayswhen women were restricted to domesticity or when being a woman meant putting the needs of the familyfirst. We are witnessing the emergence of women as effective multitaskers in a "New India." Governmentinitiativesandschemestoboostwomen'sb

Governmentinitiativesandschemestoboostwomen'sb usinessinIndiabyimprovingskillsandcreatingjobsha veaidedthis transformation. However, the country must cover more ground in order for women to break

throughtraditional barriers and succeed in the maledominated business sector.

Traditional ways to enhance work possibilities for women in the commercial and public sectors remainessential, however, due to poor literacy and skill samongahugenumberofwomeninIndia.Evenyet,thes emeasures alone will not be sufficient to raise the number of femaleworkers in the economy. Women'sunderrepresentation in business is a wasted opportunity, socially economically. Entrepreneurshipis instrument for fostering financial independence among women since it has the ability to createemployment, drive creativity, increase selfreliance, and change gender dynamics in society, all of whichcan help to reshape India's economy. But it remains a mostly untapped opportunity for women in theproductiveagegroupinIndia.
