ABSTRACT:

Insoul-T Therapy like a proton therapy but proton therapy is more side effective and damage body tissue

But insoul therapy based on photons with special frequency and wave length which is able to send signal to brain and balance chemical processor in body specially effective dopamine, And neurotransmitter and receiver of nerves system

Its creates frequency passing through neurotrans-

mitter and specially increase GABA (Gamma-Amino butyric acid)

When GABA is in form then metabolic disorder glucose level is in balance according to the neurons ratio of format; Adenine, Guanine

Beta cell getting good work according to formation of body cells processor

This therapy takes time according to glucose level in human body and how is extra which burns as ketones of bodies

Figure 1: Figure showing GABA level, how its increase for protecting cell and signal to neurotransmitters

And due to therapy day by day its increase and goes strong immunity

And its remove Diabetes mellitus, Heart disease and Insomaniya

Insoul-T emits signal with special frequency to the brain and body tissue

Which helps to chemical balance in body according to ratio of energy in body

Figure 2: Its the Equipment which is a photo- electronic device name is Insoul-T

Its Emmits Signal with required frequency for
treatment as proceser of chemical reaction in body

Reffrence
