I. INTRODUCTION

The rules of coursework for diabetes were first developed in medical astrology. To further confirm the rules of conjunction this study was primarily about collecting the horoscopes of patients being treated for diabetes in various hospitals, examining the planets in their horoscopes and confirming the structure of the planets for diabetes in their horoscopes. The field work was carried out very well and the details of the horoscope disease, date of birth, month, year, place and time were collected to be very accurate. For this, the astrological sources and explanations for diabetes were collected through various astrological sources.

The main purpose of this study is to establish and confirm the hypotheses for diabetes, the impact of the 6th, 8th, 12th houses that cause diabetes, and the influence of the planets Venus, Guru, Saturn and the Moon, which are considered to be the causes of diabetes, in the horoscope of diabetics. The study is to explore how diabetes is caused by the association of these houses and the planets through the collected horoscopes.

II. DIABETES - A HISTORY:

Diabetes is commonly referred to as "diabetic" in the medical world. It is known that the human race was afflicted with diabetes about 3000 years ago.

Diabetes is also known as Pramekam, the famous doctor of India, and Madhume kam, the doctor of Susrugar. The impact of the disease has been known since Greek times. It is known that in the 2nd century AD in Greek times, Aridius, a student of Hippocrates, called this disease "diabetic". "Melitis" means honey. The Romans called this disease "pelitis". And the Arab doctor, Abusina,

mentioned that something like honey comes out of the kidneys.

The disease was known to affect people over the age of forty. The disease is more common in men than women. Data also show that the disease is hereditary. The severity of diabetes is determined based on the function of the pancreas in the human body. The severity of diabetes is determined by the fact that the pancreas is completely dysfunctional and slightly dysfunctional. Diabetes is more severe if the pancreatic organ is completely damaged, and if slightly affected, the impact of diabetes may be mild.

III. ASPECTS IN DIABETES HOROSCOPES:

1. The planet in the star of the sixth lord creates or develops the disease of the planet seen with the sixth lord.
2. The sixth house in Lagna brings planetary disease and the planet standing in a star, a planet belonging to, a planet seen or developing disease that develops diabetes.
3. The two hostile planets are in the same zodiac sign or look at the same zodiac sign, the zodiac sign is to be treated for disease or surgery or injury.
4. Dasa, Buddhi brings disease when traveling in the negative zodiac signs in the constellation of the planets standing in the star of Andara Nathan.
5. The most visible planet in a horoscope and the least visible planet can cause or develop disease in the horoscope.
